# WinterSets

veilig de winter door

Continental 

## Wintersets, ook voor uw veiligheid!

### Toegestane maximumsnelheid van winterbanden.

Een van winterbanden voorzien voertuig mag niet harder rijden dan de maximumsnelheid die bij de winterbanden hoort.

### Wettelijke bepaling:

Het is voorschrift dat in auto's, waarbij de topsnelheid de maximumsnelheid van de banden overschrijdt, een duidelijke sticker in het zichtveld van de bestuurder wordt aangebracht. Zie afbeelding hieronder. In Nederland zijn deze stickers verkrijgbaar bij Continental Banden Groep B.V., afdeling verkoop, tel. (0342) 49 78 83.

### Wetgeving en profieldiepte.

In sommige landen zijn winterbanden verplicht. In andere landen met een winters klimaat, waaronder de populaire wintersportgebieden, dient de uitrusting van de auto te zijn aangepast aan de (te verwachten) weersomstandigheden. En aangezien er in de winter kans op sneeuw, ijs en modder is, doet u er verstandig aan winterbanden te monteren en sneeuwkettingen mee te nemen. In geval van een aanrijding loopt u anders groot risico (mede-) aansprakelijk of zelfs strafbaar te worden gesteld.

Wettelijk worden winterbanden als zodanig gekenmerkt als ze zijn voorzien van het sneeuwvloksymbool.

Beneden de 7 graden Celsius verliezen zomerbanden hun elasticiteit en grip. Winterbanden daarentegen zijn van een andere compound gemaakt, waardoor zij hun elasticiteit behouden. Ook het profiel van een winterband is speciaal afgestemd op de koude periode met een goede waterafvoer en duizenden lamellen die op sneeuw en ijs een enorme grip ontwikkelen ten opzichte van zomerbanden.

Voorwaarde voor een goede werking van een winterband is wel, dat de profieldiepte niet te laag wordt. Voor het gebruik in de winter adviseren wij alleen winterbanden met een profieldiepte van meer dan 5 mm. In enkele landen (bijv. Oostenrijk) is de minimum eis voor winterbanden 4 mm.

Ook is het aan te raden om winterbanden na 4 seizoenen te vervangen omdat de moleculaire structuur tijdens de opslag in het warme seizoen wordt aangetast waardoor de wintereigenschappen afnemen (uitharding).

De WinterSet is een combinatie van winterbanden en lichtmetalen of stalen wielen die optimaal is afgestemd op de diverse automodellen. Met een speciale setprijs die de aanschaf aantrekkelijker maakt.

### Bandenspanningcontrolesysteem.

Alle wintersets worden geleverd zonder bandenspanningcontrolesysteem.

### Let op bij afwijkende remmen.

Door montage van grotere remschijven kunnen afwijkingen ontstaan!

## Zomer- en winterbandenhotel, gemak dient de mens!

De zorg voor opslag en beheer van een extra set banden kunt u bij uw klant wegnemen door het Bandenhotel aan te bieden. Het Bandenhotel, een gezamenlijke dienst van de dealerorganisatie en Continental Banden Groep is een full service dienst voor winterbandenklanten, inclusief administratie, transport, opslag en verzekering.

Deelnemers in zowel de zakelijke (lease) als particuliere markt kunnen van deze dienst gebruik maken. U kunt hierover meer lezen in het Bandenhotel reglement dat verkrijgbaar is bij onze afdeling verkoop.
